Basic Heat Loss Calculator

According to EN442, inlet water temperature of 75°C, outlet water temperature of 65°C, and room temperature of 20°C are assumed. All heat output figures shown in our publications are aligned to EN442.

The total heat output of the radiator you choose must compensate for the heat loss of your room, so that it will maintain the interior temperature at 20°C. The following calculation will give you an indication of your heat loss. If you have limited wall space or a very large room, you can install more than one radiator per room.

It is advisable to locate radiators near windows and doors, where heat loss is highest.

Measure your living room in metres

Height _m : Length_m : Depth_m

ie : H:2.64m, L:3.65m, D:4.94m

Calculate the volume of the room

$h \times L \times D = \text{cubic metres}$

ie : $2.64 \times 3.65 \times 4.94 = 47.60$ cubic metres

Multiply by a coefficient for each desired room temperature

42: bedrooms (to achieve 18°C)

52: bathrooms, wc, living, study, dining etc (to achieve 21°C)

In our example:

The living room (52): $47.60 \times 52 = 2475$ watts

The heat loss in the living room is 2475 watts, but we need to consider the following factors for a better result – we need to add 10% for every factor given here below:

- Outside walls: if it is a corner room, calculate two outside walls, which means (10% and 10%)
- Northern aspect room
- Ceiling height more than 2.7m
- Excessively large windows
- Single glaze
- Outside temperature assumed as -1°C, but if you would like to assume -2°C add 10%, -4°C add another 10%, -10°C add another 10%

In our example, we have:

One outside wall, and one excessive window.

$2475 \times 1.1 \times 1.1 = 2970$ watts or 2554 kcal or 10144 BTU – the final heat loss calculation.

This condition 3.3 shall survive termination of the Contract.
- The Seller reserves the right to amend the Specification if required by any applicable statutory or regulatory requirements. If such amendments will materially change the nature or quality of the Goods, the Seller shall notify the Buyer who may then terminate the Contract.

- If for any reason the Buyer fails to take or accept delivery of any of the Goods within 10 days of the Seller giving it notice that the Goods are ready for delivery, or the Seller is unable to deliver the Goods on time because the Buyer has not provided appropriate instructions, documents, licences or authorisations, risk in the Goods shall pass to the Buyer (including loss or damage caused by the Seller's negligence); the Goods shall be deemed to have been delivered at 9.00 am on the tenth day after the day on which the Seller notified the Buyer that the Goods were ready for delivery; and
- (c) the Seller may store the Goods until delivery, upon which the Buyer shall be liable for all related costs and expenses (including, without limitation, storage and insurance).
- If 10 days after the day on which the Seller notified the Buyer that the Goods were ready for delivery the Buyer has not taken or accepted delivery of them, the Seller may, as an alternative or in addition to its rights under condition 4.6(c), resell or otherwise dispose of part or all of the Goods and, after deducting reasonable storage and selling costs, account to the Buyer for any excess over the price of the Goods or charge the Buyer for any shortfall below the price of the Goods.
